1.2 EXECUTIVE SUMMARY

INTRODUCTION AND BACKGROUND

The purpose of the 2017/18 – 2019/20 MTREF budget is to comply with the MFMA (No 56 of 2003) and is a financial plan to enable the municipality to achieve its vision and mission through the IDP Strategy which is informed by our development agenda and community/stakeholder inputs.

PRESSURES FACING THE MUNICIPALITY

- *Higher levels of expenditure than revenue received;*
- *High level of debt outstanding.*
- *Low debt collection.*
- *Increasing pressure on the repairs and maintenance budget due to ageing infrastructure and the vehicle fleet, as well as inherited service delivery backlogs to be eradicated.*
- *Registering of projects.*
- *The Municipality's infrastructure needs are enormous – the challenge is to balance the developmental demands for service with the available resources.*
- *Inability to meet our obligation to pay our top 5 creditors creditor's within 30 days.*
- *The municipality ability to service landfill sites*

HIGHLIGHTS ON THE BUDGET

Circular 42 states :

- A Financial Performance budget surplus/deficit in itself is not an indication of a “funded budget”, due to items such as capital grants, depreciation and provisions.
- Let’s assume, for example, that a municipal Financial Performance budget shows a deficit.
- This deficit would not exist if budgeted depreciation was not included. Trying to apply the past mindset of a “balanced budget” to the Financial Performance budget may result in a view that consumer charges will need to be increased to cover the depreciation. This may not be the case, since a deficit on the Financial Performance budget does not necessarily mean that the budget is not funded.

The following graph is a breakdown of the operational revenue per main category for the 2017/18 financial year.

The municipality decrease from R246 223 866 to R234 780 858, it must be noted that all revenue items has been increase as per Circular 86 of the MFMA, however please take note that several items occurred as a once off in the 2016-17 financial year and was not budgeted again in the new financial year.

Property Rates, services charges relating to electricity, water, sanitation and refuse removal constitutes the biggest component of the revenue basket of the municipality with electricity revenue contributing 34%.

Operational grants and subsidies contribute 19% of the municipality's revenue and all other revenue excluding service charges only contributes 6% of the municipality's revenue.

Free basic services are directly deducted from service charges this resulted in the service charges showing a decline in the 2017-18 financial year, while the municipality are in a process of introducing new electricity meters which has shown the municipality have billed less electricity in certain cases and the necessary correction was made in the 2017-18 financial year.

Operating Expenditure Budget - Highlights

The following are the highlights of the operating expenditure budget:

Personnel Costs

Personnel costs increase by 7% (R5 477 million) based on the 2016/17 approved adjustment budget of R78 101 million to R83 577 million in 2017/18. This expenditure category constitutes 29% of the operating budget. The allocation for the two outer years of the MTREF period is R88 341 million and R93 342 million respectively.

General Expenditure

General expenditure decrease from R49 468 million in 2016-17 million to R19 601 million in the 2017/18 budget year; the biggest contributing factor being that free basic services is no longer seen as expenditure is deducted from services charges, other items are included under contracted services in the new MSCOA trial balance. The allocation for the two outer years of the MTREF period is R20 719 million and R21 885 million respectively.

Bulk purchases

Bulk purchases (water and electricity) grew by 3.3% (R3 147 million) against the 2016/17 budget to the proposed amount of 98 724 million for the 2017/18 budget year. The allocation for the two outer years of the MTREF period is R104 352 million and R110 300 million respectively. Bulk purchases takes up approximately 34% of the operating budget for 2017/18.

Interest on External Borrowing

The municipality current loan will end on 31 March 2017.

Depreciation & asset impairment

Depreciation & asset impairment is R43 517 million for the 2017/18 budget year and R45 998 million and R48 610 million for the respective outer years.

Repairs and Maintenance /Other Materials

Please that the description criteria of repair and maintenance have changes with MSCOA and expenses relating to repair and maintenance are included in general expenses and contracted services.

Debt Impairment

Debt impairment for the 2017/18 is R9 977 349 million. The outlook in the provision amount for the two outer years of the MTREF period is R10 546 million and R11 137 million respectively

Table A1 is a budget summary and provides a concise overview of the municipalities budget from all of the major financial perspectives (operating, capital expenditure, financial position, cash flow, and MFMA funding compliance).

2. The table provides an overview of the amount approved by council for operating performance, resources deployed to capital expenditure, financial positions, cash and funding compliance, as well as the municipality's commitment to eliminating basic service delivery backlogs.

3. Financial management reforms emphasize the importance of the municipal budget being funded. This requires the simultaneous assessment of the Financial Performance, Financial Position and Cash Flow Budgets, along with the Capital Budget. The Budget Summary provides the key information in this regard:

- a. The operating surplus/deficit (after Total Expenditure) is positive over the MTREF
- b. Capital expenditure is balanced by capital funding sources, of which
 - i. Transfers recognized is reflected on the Financial Performance Budget
 - ii. Borrowing is incorporated in the net cash from financing on the Cash Flow Budget
 - iii. Internally generated funds are financed from a combination of the current operating surplus and accumulated cash-backed surpluses from previous years. The amount is incorporated in the Net cash from investing on the Cash Flow remains, and is improving indicates that the necessary cash resources are available to fund the Capital Budget.

4. The Cash backing/surplus reconciliation shows that in previous financial years the municipality was not paying much attention to managing this aspect of its finances, and consequently was not paying much attention to managing this aspect of its finances, and consequently many of its obligations are not cash-backed. These places the municipality in a very vulnerable financial position, as the recent slow-down in revenue collections highlighted. Consequently Council has taken a deliberate decision to ensure adequate cash-backing for all material obligations with the development of the final Funding and Reserves Policy. This cannot be achieved in one financial year. The municipality is to strive to have all of its reserves to be backed up by cash in the medium to long term period.

EXPLANATORY NOTES TO TABLES A2 TO A9

1. Table A2-Budgeted Financial Performance (revenue and expenditure by standard classification)

Table A2 is a view of the budgeted financial performance in relation to revenue and expenditure per standard classification. The modified GFS standard classification divides the municipal services into 15 functional areas. Municipal revenue, operating expenditure and capital expenditure are then classified in terms of each of these functional areas which enables the National Treasury to compile 'whole of government' reports.

2. Table A3- Budgeted Financial Performance (revenue and expenditure by municipal vote)

Table A3 is a view of the budgeted financial performance in relation to the revenue and expenditure per municipal vote. This table facilitates the view of the budgeted operating performance in relation to the organizational structure of the municipality. This means it is possible to present the operating surplus or deficit of a vote.

3. Table A4- Budgeted Financial Performance (revenue and expenditure)

Table A4 is a view of the budgeted financial performance in relation to the revenue by source and expenditure by type. This table facilitates the view of the budgeted operating performance in relation to indicates the sources of funding and on what activities are the scarce resources are to be spent on.

4. Table A5- Budgeted Capital Expenditure by vote, standard classification and funding source

Table A5 is a breakdown of the capital program in relation to capital expenditure by municipal vote (multi-year and single-year appropriations) capital expenditure by standard classification; and the funding sources necessary to fund the capital budget, including information on capital transfers from national and provincial departments.

5. Table A6- Budgeted Financial Position

Table A6 is consistent with international standards of good financial management practice and improves understanding of the councilors and management of the impact of the budget on the statement of financial position (balance sheet). This format of presenting the statement of financial position is aligned to GRAP 1 which is generally aligned to the international version which presents Assets less Liabilities as 'accounting' Community Wealth. The order of items which each group illustrates items in order of liquidity; i.e. assets readily converted to cash, or liabilities immediately required to be met from cash, appear first.

6. Table A7 -Budgeted Cash Flow Statement

The budgeted cash flow statement is the first measurement in determining if the budget is funded. It shows the expected level of cash in-flow versus cash out-flow that is likely to result from the implementation of the budget.

7. Table A8-Cash Backed Reserves/Accumulated Surplus Reconciliation

The cash backed reserves/accumulated surplus reconciliation is aligned to the requirements of MFMA Circular 42-Funding a Municipal Budget. In essence the table evaluates the funding levels of the budget by the firstly forecasting the cash and investments at the year end and secondly reconciling the available funding to the liabilities/commitments that exist. The outcome of this exercise would either be a surplus or deficit. A deficit would indicate that the

applications exceed the cash and investments available and would be indicative of non-compliance with the MFMA requirements that the municipality's budget must be 'funded'.

8. Tables A9-Asset Management

Table A9 provides an overview of municipal allocations to building new assets and the renewal of existing assets, as well as spending on repairs and maintenance by asset class.

PART 2 – SUPPORTING DOCUMENTATION

2.1. OVERVIEW OF ANNUAL BUDGET PROCESS

The MFMA requires the mayor of a municipality to provide general political guidance over the budget process and the priorities that must guide the preparation of a budget. The new National Treasury Budget Regulations gives further effect to this by prescribing that the mayor of a municipality must establish a Budget Steering Committee to assist in discharging the mayor's responsibility' set out in section 53 of the Municipal Financial Management Act. Compilation of the Municipality's annual budget commenced with the presentation of the budget parameters to the Budget Committee composed of executive political representatives. The Committee's terms of reference include the following:

- **To provide guidance on budget principals;**
- **To consider final budget operational and capital parameters;**
- **To review directorates' budget inputs via budget hearings after tabling of the final budget; and**
- **To review and advice on the outcome of MTREF**

2.3 MEASURABLE PERFORMANCE OBJECTIVES AND INDICATORS

Measurable performance objectives and indicators

Performance Management is a system intended to manage and monitor service delivery progress against the identified strategic objectives and priorities. In accordance with legislative requirements and good business practices as informed by the National Framework for Managing Programme Performance Information, Nama Khoi municipality did not have a performance management system, however the municipality has developed and will implement a performance management system in the current financial year,

Blue Drop

Regulatory Impression

Nama Khoi Municipality performed essentially the same in the 2014 Blue Water Services Audit with a score of 63.9% compared to the Blue Drop 2012 score of 63.5%. The Municipality is encouraged to continue to build on the improvements achieved.

The Municipality is congratulated with the good quality documents produced such as the excellent, comprehensive and well documented Water Safety Plans (WSP) developed through a consultative process. The Municipality is encouraged to judiciously implement them. Nama Khoi also provided Water Use Efficiency and Water Loss Management information per system and that is acknowledged. Note that the water safety plans for the system where Sedibeng Water (SW) is the provider have not been uploaded on BDS and that should be done.

The Buffelsrivier, Komaggas, Vioolsdrift, Rooiwal and Goodhouse systems are fully supplied by the Nama Khoi Municipality itself, while Sedibeng (Namaqua) Water supplies bulk water to the remaining 10 systems from Henkries WTP. These ten systems could be incorporated into one system as these supply 10 towns, but is only one treatment works.

Of concern at Nama Khoi is the following: lack of free chlorine measurement despite some microbiological failures; lack of a full SANS 241 analysis on the water sources and distribution; multiple microbiological failures at Buffelsrivier, Vioolsdrif and insufficient number of samples being taken for microbiological analyses being done; insufficient number of determinants being analysed for operational and aesthetic compliance; insufficient supervisor and process control competencies in the different systems; and lack of water use efficiency and water loss management information for the systems where Sedibeng Water is the provider.

Based on the above Audit results, the DWS has serious concerns on the lack of information or poor microbiological drinking water quality and the resultant risk to consumers of the Buffelsrivier, Goodhouse, Rooiwal, Vioolsdrif, Henkries-Carolusberg- and Henkries-Concordia water supply systems. These concerns have to be addressed as a matter of urgency and drinking water quality results and appropriate actions must be communicated to consumers should the water be found to be unfit for human consumption.

The Municipality and Sedibeng Water should develop a Blue Drop Improvement Plan to progressively address the concerns and improve water service provision in the different systems. Urgent and immediate intervention is needed in the systems where the microbiological quality failed. The Municipality and SW should manage the systems to ensure that the water quality and quantity are monitored and managed appropriately.

The overall 2014 Risk Rating for Nama Khoi medium at 55%. Note that this value is based on the specific areas indicated below.

The Process Control Risk Rating is low to high. This risk reflects compliance in terms of the draft Regulation 813.

The Drinking Water Quality Risk Rating was low to high. The Risk Management Risk Rating was very low.

Green Drop

Regulatory Impression

NamaKhoi LM is commended for their diligence in uploading data to the GDS. Log sheets and inspection reports are available for most sites. Well done. The technical staff may be more consistent in completing the records. The municipality is applauded for the allocation of funds and resources to support the work on pumpsets, fences, biofilters, and O&M. The improvement in working conditions for the PCs is encouraging (PC cabins) and set a benchmark for the province.

The risk rating of the Concordia, Komaggas and Okiep plants have improved significantly, which is attributed to the “No Monitoring Required” allowed by the Regulator on the final effluent quality. The municipality is to note

however, that this risk profile may change if an Authorisation which stipulates NMR is not presented at

however, that this risk profile may change if an Authorisation which stipulates NMR is not presented at the next Green Drop Audit. Monitoring of the groundwater system through boreholes is also required.

Carolusberg, Nabadeep, Springbok and Steinkop plants are all categorised as high risk largely due to erratic monitoring, poor compliance and inadequate flow monitoring. The Regulator is particularly concerned about the Bergsig plant which is rated critical due to hydraulic overload, erratic monitoring, inadequate supervisory and process control and general poor O&M. The Municipal officials display a positive attitude and it is believed that with management support and appropriate allocation of resources that the score of 34.15% achieved during the 2013 assessment can be improved. The Regulator holds high anticipation that the municipality will elevate its GD score to >60% if the risk based process is followed and presented.

2.4 OVERVIEW OF BUDGET-RELATED POLICIES

Overview of budget related-policies

The Municipality's budgeting process is guided and governed by relevant legislation, frameworks, strategies and related policies.

Budget Policies

The following are policies that govern the municipality's budget, compilation and/or implementation thereof:

To be added after the community participation process

2.5. Overview of budget assumptions

2.5.1. General inflation outlook and its impact on the municipal activities

There are five key factors that have been taken into consideration in the compilation of the 2017/18 MTREF:

- National Government macro economic targets;
- The general inflationary outlook and the impact on Municipality's residents and businesses;
- The impact of municipal cost drivers;
- The increase in prices for bulk electricity and water; and
- The increase in the cost of remuneration. Employee related costs comprise 29 per cent of total operating expenditure in the 2017/18 MTREF.

Headlines mentioned by National Treasury in circular 86 were taken into consideration when compiling 2017/18 MTREF

HEADLINES INFLATION FORECASTS AS PER NATIONAL TREASURY GUIDELINES CIRCULAR 86		
2017/18	2018/19	2019/20
6.4%	5.7%	5.6%

A provision for 7.1 per cent increase in salaries has been made

2.5.2. Interest rates for borrowing and investment of funds

The MFMA specifies that borrowing can only be utilised to fund capital or refinancing of borrowing in certain conditions. However, for simplicity the 2017/18 MTREF is based on the assumption that all borrowings are undertaken using fixed interest rates for amortisation-style loans requiring both regular and bi-yearly principal and interest payments. Please note the municipality current loan will end on 31 March 2017.

2.5.3. Collection rate for revenue services

The base assumption is that tariff and rating increases will increase at a rate slightly higher than CPI over the long term. It is also assumed that current economic conditions, and relatively controlled inflationary conditions, will continue for the forecasted term.

Cash flow is assumed to be 93.1 per cent of billings, plus an increased collection of arrear debt from the revised collection and credit control policy. The performance of arrear collections will however only be considered a source of additional cash in-flow once the performance has been carefully monitored.

2.5.4. Growth or decline in tax base of the municipality

Debtor's revenue is assumed to increase at a rate that is influenced by the consumer debtor's collection rate, tariff/rate pricing, real growth rate of the Municipality, household formation growth rate and the poor household change rate.

Household formation is the key factor in measuring municipal revenue and expenditure growth, as servicing 'households' is a greater municipal service factor than servicing individuals. Household formation rates are assumed to convert to household dwellings. In addition the change in the number of poor households influences the net revenue benefit derived from household formation growth, as it assumes that the same costs incurred for servicing the household exist, but that no consumer revenue is derived as the 'poor household' limits consumption to the level of free basic services.

2.5.5. Salary increases

Nama Khoi municipality has made provision for a 7.1% salary increase for 2017/18 as per MFMA Circular 85.

2.5.6. Impact of national, provincial and local policies

Integration of service delivery between national, provincial and local government is critical to ensure focussed service delivery and in this regard various measures were implemented to align IDPs, provincial and national strategies around priority spatial interventions. In this regard, the following national priorities form the basis of all integration initiatives:

- Creating jobs;
- Enhancing education and skill development;
- Improving Health services;
- Rural development and agriculture; and
- Fighting crime and corruption.

To achieve these priorities integration mechanisms are in place to ensure integrated planning and execution of various development programs. The focus will be to strengthen the link between policy priorities and expenditure thereby ensuring the achievement of the national, provincial and local objectives.

2.5.7. Ability of the municipality to spend and deliver on the programmes

It is estimated that a spending rate of at least 90 per cent is achieved on operating expenditure.

In order to be able to implement all projects in the budget the municipality will need to strictly implement its credit control policy. The municipality will strive to have stricter control over free basic services uses in the new financial year.

2.6.1.1. Cash/cash equivalent position

The Municipality's forecast cash position was discussed as part of the budgeted cash flow statement. A 'positive' cash position, for each year of the MTREF would generally be a minimum requirement, subject to the planned application of these funds such as cash-backing of reserves and working capital requirements.

If the municipality's forecast cash position is negative, for any year of the medium term budget, the budget is very unlikely to meet MFMA requirements or be sustainable and could indicate a risk of non-compliance with section 45 of the MFMA which deals with the repayment of short term debt at the end of the financial year.

2.6.1.2. Cash plus investments less application of funds

The purpose of this measure is to understand how the municipality has applied the available cash and investments as identified in the budgeted cash flow statement.

2.6.1.3. Monthly average payments covered by cash or cash equivalents

The purpose of this measure is to understand the level of financial risk should the municipality be under stress from a collection and cash in-flow perspective. Regardless of the annual cash position an evaluation should be made of the ability of the Municipality to meet monthly payments as and when they fall due. It is especially important to consider the position should the municipality be faced with an unexpected disaster that threatens revenue collection such as rate boycotts.

2.6.1.4. Surplus/deficit excluding depreciation offsets

The main purpose of this measure is to understand if the revenue levels are sufficient to conclude that the community is making a sufficient contribution for the municipal resources consumed each year. An 'adjusted' surplus/deficit is achieved by offsetting the amount of depreciation related to externally funded assets. Municipalities need to assess the result of this calculation taking into consideration its own circumstances and levels of backlogs. If the outcome is a deficit, it may indicate that rates and service charges are insufficient to ensure that the community is making a sufficient contribution toward the economic benefits they are consuming over the medium term.

2.6.1.5. Property Rates/service charge revenue as a percentage increase less macro inflation target

The purpose of this measure is to understand whether the municipality is contributing appropriately to the achievement of national inflation targets. This measure is based on the increase in 'revenue', which will include both the change in the tariff as well as any assumption about real growth such as new property development, services consumption growth etc.

.

2.6.1.6. Cash receipts as a percentage of ratepayer and other revenue

This factor is a macro measure of the rate at which funds are 'collected'. This measure is intended to analyze the underlying assumed collection rate for the MTREF to determine the relevance and credibility of the budget assumptions contained in the budget. The municipality has a funded budget for the budgeted year as well as the outer financial years.

2.6.1.7. Debt impairment expense as a percentage of billable revenue

This factor measures whether the provision for debt impairment is being adequately funded and is based on the underlying assumption that the provision for debt impairment (doubtful and bad debts) has to be increased to offset under-collection of billed revenues.

2.6.1.8. Capital payments percentage of capital expenditure

The purpose of this measure is to determine whether the timing of payments has been taken into consideration when forecasting the cash position.

2.6.1.9. Borrowing as a percentage of capital expenditure (excluding transfers, grants and contributions)

The purpose of this measurement is to determine the proportion of a municipality's 'own-funded' capital expenditure budget that is being funded from borrowed funds to confirm MFMA compliance. The municipality capital budget at this stage only consist of grant funding.

2.6.1.10. Transfers/grants revenue as a percentage of Government transfers/grants available

The purpose of this measurement is mainly to ensure that all available transfers from national and provincial government have been budgeted for. A percentage less than 100 per cent could indicate that not all grants as contained in the Division of Revenue Act (DoRA) have been budgeted for. The Municipality has budgeted for all transfers. The municipality intends to spent 100% of its allocated grants.

2.6.1.11. Consumer debtors change (Current and Non-current)

The purpose of these measures is to ascertain whether budgeted reductions in outstanding debtors are realistic. There are 2 measures shown for this factor; the change in current debtors and the change in long term receivables, both from the Budgeted Financial Position.

2.6.1.12. Repairs and maintenance expenditure level table 34c

This measure must be considered important within the context of the funding measures criteria because a trend that indicates insufficient funds are being committed to asset repair could also indicate that the overall budget is not credible and/or sustainable in the medium to long term because the revenue budget is not being protected.

2.6.1.13. Asset renewal/rehabilitation expenditure level

This measure has a similar objective to aforementioned objective relating to repairs and maintenance. A requirement of the detailed capital budget (since MFMA Circular 28 which was issued in December 2005) is to categorize each capital project as a new asset or a renewal/rehabilitation project. The objective is to summarize and understand the proportion of budgets being provided for new assets and also asset sustainability. A declining or low level of renewal funding may indicate that a budget is not credible and/or sustainable and future revenue is not being protected, similar to the justification for 'repairs and maintenance' budgets. The municipality currently is reliant on grant funding for the renewal of its assets.

Cash Flow Management

Cash flow management and forecasting is a critical step in determining if the budget is funded over the medium-term. The table below is consistent with international standards of good financial management practice and also improves understandability for councilors and management. Some specific features include:

- Clear separation of receipts and payments within each cash flow category;
- Clear separation of capital and operating receipts from government, which also enables cash from 'Ratepayers and other' to be provide for as cash inflow based on actual performance. In other words the actual collection rate of billed revenue, and
- Separation of borrowing and loan repayments (no set-off), to assist with MFMA compliance assessment regarding the use of long term borrowing (debt).

2.8 Legislation compliance status

Compliance with the MFMA implementation requirements have been substantially adhered to through the following activities:

1. In-year reporting

Reporting to National Treasury in electronic format was fully complied with on a monthly basis. Section 71 reporting to the Executive Mayor (within 10 working days) has progressively improved and includes monthly published financial performance on the Municipality's website.

2. Internship program

Nama Khoi Municipality is participating in the Municipal Financial Management Internship program and has employed five interns undergoing training in various divisions of the Financial Services Department. Of the five interns one has been allocated under the Internal Audit Unit.

3. Budget and Treasury Office

The Budget and Treasury Office has been established in accordance with the MFMA.

4. Audit Committee

An Audit Committee has been established and is fully functional.

5. Service Delivery and Implementation Plan

6. Annual Report

.

7. MFMA Training

The MFMA training module in electronic format will be presented at the Municipality's internal centre and training is ongoing.

8. Policies

Amendment on the financial policies is submitted together with this budget.
